

## The Living Legacy Forever Flowers Garden is a new sustainable end-of-life memorial option available for the first time in South Australia exclusively at Centennial Park.

Partnering with Living Legacy, Centennial Park will exclusively offer the unique living memorial option as part of its environmental plans to diversify and adapt to meet the increasing demand for sustainable and less emission intensive end-of-life choices.

It is an environmentally conscious way to return loved one's ashes to the earth by transforming the ashes into flowers that will live on in the beautiful, landscaped garden for friends, family and future generations to enjoy.

Living Legacy have formulated a scientific process that detoxifies and transforms ashes into micronutrients which are infused into the Forever Flowers Garden to help it grow, so a person's life can be perpetuated through the flowers of thousands of seeds and seedlings.

The Living Legacy treatment detoxifies and balances pH of the ashes so it can sustain and perpetuate life through trees, plants and flowers.

*"By becoming part of the Living Legacy Forever Flowers Garden your life goes on to create a positive touchpoint that connects loved ones to the beauty your life created."*

Warren Robert  
Founder Living Legacy

“

This is a step in the right direction, being able to give life to the planet by growing through the beauty of nature – it's a win-win and a form of memorialisation I hope becomes more widely available.

– Christopher
